

IJABE works together toward a bright and shared future

In 2021, we experienced an eventful and fruitful year facing the global pandemic of COVID-19 and many uncertainties. All the 183 papers published in the International Journal of Agricultural and Biological Engineering (IJABE) in 2021 have been indexed and abstracted by the Web of Science Core Collection and the other famous indexing databases in a timely manner. The total number of DOI resolutions of IJABE papers from January 2021 to January 2022 reached 53 338, with increasing international resolutions. The Fourth Term IJABE International Editorial Board was updated, and more outstanding young researchers were recruited to be included in the editorial board. IJABE keeps bursting with new vitality.

To promote scholarly communication among Chinese peers, IJABE has regularly released both the Chinese and English abstracts of papers published in each issue to the WeChat Official Account and WeChat group of IJABE since May 2021. IJABE WeChat Official Account has pushed 246 items including abstracts in 2021. The total number of readers reaches 44 719, the total number of reader views is 64 308, the average number of reader views is 261, and the total number of followers is 2003. The number of frequent readers increased to 504, and the proportion of frequent readers increased to 26.69%.

IJABE has been indexed and abstracted by the Web of Science Core Collection since 2013. According to the 2021 update of Journal Citation Reports® (JCR2020) released by Clarivate Analytics on June 30, 2021, the latest impact factor of IJABE is 2.032, ranking the 6th out of 14 SCI-indexed agricultural engineering journals, located in Quartile 2 (Q2). Welcome to publish with IJABE!

We are sure that with the rapid evolution of the digital age and interdisciplinary technologies, we are being offered tremendous opportunities to shape the future of our field and make a visible impact with the journal. IJABE, via strict and serious peer-review, ensures to serve as the leading global source of high-quality papers in the field of agricultural and biological engineering. It is a win-win among authors, readers, and editors. Therefore, we are thrilled to work with all of you—readers, authors, reviewers, section editors, Editorial Board members, and IJABE professional staff—to support and promote the further development of IJABE as the ideal platform to report new scientific findings and exchange new ideas. Together for a shared future, we will continue the success of IJABE and bring it to the next higher level. We welcome your comments, suggestions, and feedback at ijabe@ijabe.org.

IJABE is a peer-reviewed journal that disseminates impactful, scientifically sound, and important research in the field of agricultural and biological engineering. We plan to organize some special columns of hot topics such as sensing or detection technologies, agricultural robots, artificial intelligence, big data, smart agriculture, and advanced sensors. Guest editors, volunteers are welcome.

Thank you to all our authors, readers, reviewers, and editors!

《国际农业与生物工程学报》(IJABE)
最新影响因子2.032 (JCR2020),
首次突破2, 再创新高居全球农业工程学科第6进Q2区!

IJABE

Editor-in-Chief: Dr. Prof. Wang Yingkuan

Sponsored by Chinese Society of Agricultural Engineering (CSAE),

Supported by Academy of Agricultural Planning and Engineering (AAPE),

Ministry of Agriculture and Rural Affairs, PRC

Co-Sponsored by Association of Overseas Chinese Agricultural, Biological and Food Engineers
