

Warm congratulations on IJABE's inclusion in Ei Compendex

IJABE has recently been included for abstracting and indexing in Ei Compendex after strict peer review and evaluation by the Compendex Scope and Coverage Committee. Warm congratulations on IJABE's coverage in Ei Compendex!

According to the 2013 Compendex Source List issued by Elsevier at its website (<http://www.ei.org/compendex>), 3681 journals have been included in the new Compendex Source List in 2013, with the increase of 145 journals, compared with 3536 journals in 2012. In China, there are 173 journals included in this 2013 Compendex list. In agricultural-related areas, there are 28 journals in the world.

Compendex is one of the most comprehensive engineering literature databases available to engineers. Compendex aims to be the most complete and comprehensive resource for research and trade literature in the field of Engineering, and, therefore additional journals are selected annually for inclusion in Compendex by the external, independent Compendex Scope and Coverage Committee, based on its collective professional expertise and background. In terms of journal inclusion criteria, overall quality must be high. Assessment of a journal's quality may include, but is not limited to, the following: Authority, including the reputation of a commercial or society publisher; the affiliation of authors and the existence/affiliation of an editorial board.
